809/1 ESD Stubby Bitholding screwdriver, with retaining ring, 1/4" x 54 mm

ESD Series

EAN:	4013288219206	**Size:**	65x34x34 mm
Part number:	05008882001	**Weight:**	47 g
Article number:	809/1 Stubby ESD	**Country of origin:**	CZ
		Customs tariff number:	82054000

- Short compact shape for working in confined spaces
- Ergonomic 2-component Kraftform handle for precise work
- Hexagonal anti-roll feature against rolling away
- ESD bit hand-holder for electrostatically safe working, with retaining ring
- For ¼" bits as per DIN ISO 1173-C 6.3

Particularly small ESD bit hand-holder with short blade for electrostatically safe working even in hard to reach areas. Suitable for mounting bits with 1/4" external hexagon drive as per DIN ISO 1173-C 6.3 and Wera connection series 1. The 2-component handle with the practical combination of hard and soft zones allows for a firm grip and precise working. The integrated retaining ring guarantees an optimal hold of the tool in the holder. The hexagon anti-roll protection avoids bits from rolling away annoyingly in the workplace.

809/1 ESD Stubby Bitholding screwdriver, with retaining ring, 1/4" x 54 mm

ESD Series

Wera ESD Tools

The requirements for ESD-safe screwdrivers are specified in the European standard DIN EN 61340-5-1. This standard also includes a handle that has to be out of a defined conductive material. The Wera products in the ESD series satisfy these standards and the even more stringent requirements demanded by some technology companies.

High protection

The electric surface resistance of the Wera ESD material is ≤ 10^9 ohm. This securely protects components against electrostatic energy and associated damage.

Compact shape

With its compact handle shape and the short blade, the Kraftform Stubbies are particularly suitable for working in confined screwdriving situations.

Bit mounting with retaining ring

Proven holder design, optimal fitting of the tool in the holder. Particularly robust for series applications.

Tangible ergonomics

The 2-component Kraftform handle allows high power transmission due to the non-slip, softer grip areas and high working speeds due to the hard grip areas, which allow a quick hand switch.

Non-roll feature

The hexagonal non-roll feature prevents any rolling away at the workplace.
