# 840/1 IMP DC Hex-Plus DIY Impaktor bits, 3 x 25 mm, 10 pieces

Bits for Hexagon Socket Screws

IMPACT PROOF

DIAMOND

TAKE IT EASY TOOL FINDER

HEX-PLUS

| | | | |
|---|---|---|---|
| **EAN:** | 4013288178701 | **Size:** | 85x50x17 mm |
| **Part number:** | 05057603001 | **Weight:** | 43 g |
| **Article number:** | 840/1 IMP DC Hex-Plus DIY | **Country of origin:** | CZ |
| | | **Customs tariff number:** | 82079030 |

- For socket head screws
- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- 1/4" hexagon drive (Wera connecting series 1)
- Take it easy tool finder: colour coding according to profile and size

High quality Impaktor bits for hexagon socket screws. The Impaktor technology offers an above-average service life even under extreme circumstances. Enhanced friction resistance, thanks to the rough diamond-particle coating on the bit tip, prevents any slipping out of the screw head. Hex-Plus ensures a greater contact surface in the head of the screw. The notching effect is therefore reduced to a minimum and damage to the screw head more or less eliminated. ¼" hexagon, suitable for holders as per DIN ISO 1173-D 6.3.

Impaktor technology for an above-average service life even under extreme demands

## Impaktor-Bits

For an above-average service life. Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects - particularly high in power tool applications - which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

## Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

## Above-average service life

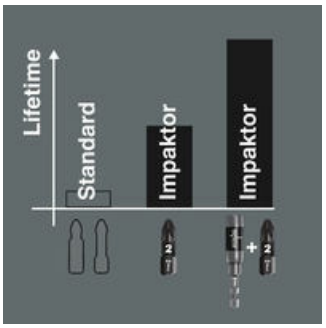

Maximum utilisation of the material properties, a very special geometry - designed particularly to meet the extreme demands - as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

### Reduced danger of bit breakage.

Particularly high strength. Reduce the danger of premature bit breakage.

### Torsion zone

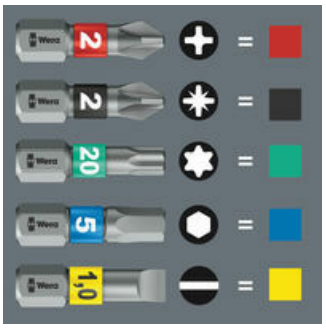

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

### Hex-Plus

Hexagon socket screws are a problem, because the contact surfaces that transfer the force of the tool to the screw are very narrow. The consequence: the head of the screw can be damaged, usually rounding out the recess. Hex-Plus tools have larger contact surfaces to prevent this, driving from the flats of the recess, rather than the corners. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

### “Take it easy” tool finder

"Take it easy" tool finder with colour coding according to profiles and size stamp - for simple and rapid accessing of the required tool.
